

## Greetings!

We have yet another fruitful month full of updates to share with you. We've been working towards gathering a better investor community, partnerships and other collaborations. However, the month of August is important to the Eleven01 Team and Community as it marks the genesis of the Eleven01 Protocol. We launched India's native blockchain protocol in August, last year at the International Blockchain Congress and began this amazing journey with a vision. On that note, for this month's newsletter, we're looking back - at everything we did to build Eleven01 to this point, and we're looking forward - to the things that we will accomplish.

## CEO's Note

Dear Eleven01 Community,

In August 2018, we officially launched Eleven01 at the International Blockchain Congress that took place in Hyderabad, India. While the project was officially launched at IBC, we had been busy crafting the vision, building the team, writing the technical whitepaper with the help of some of the best experts in the industry and formalizing the overall scope of this ambitious project since the beginning of 2018.

From the very get-go, we have had no inhibitions about the true scale of the project. We knew the opportunity as well as the challenges. It is always a daunting task to build from the ground up an innovative and product market fit offering that would enable a fresh, new wave of blockchain development opportunities starting from India and beyond. We had our sights set for building the largest blockchain ecosystem in India, and if you take into account the amazing progress we have achieved in the last year and a half, we are well on our way towards realizing that goal.

From just a vision to a product with a testnet being deployed at an ever-growing number of dapps, plethora of partnerships including Indian state governments and universities and big community of supporters and well-wishers, the overall support and response we have received across the board has been tremendous. Because of our stakeholders confidence in our team and the project, we not only survived the so-called crypto winter but came out stronger with broader traction and with bigger partnerships such as that of Microsoft.

Here at Eleven01, we are big believers in the disruptive forces of the blockchain technology and want to build a unique infrastructure with an enabling ecosystem that will be pivotal in wider deployment of blockchain across enterprises and public workloads. Harnessing the 3 million-strong engineering talent, we want to turn India into a blockchain development hub. Thus, we are - with one step at a time - bringing blockchain to the next billion users.

That said, the Eleven01 team is actively working towards materialising the objectives of Eleven01's mass adoption in blockchain with our ever-expanding partners universe, our rockstar advisory board and one of the best teams in the industry. If you would like to join us on this exciting journey, reach out to us at [community@eleven01.iome](mailto:community@eleven01.iome). We are always looking for the best talent out there.

Read more about the Eleven01 journey in the following section of this newsletter.

Thank you for your unfaltering love and support. We are only getting started. Here's to the future!

- Ausaf Ahmad,  
CEO of Eleven01

## Here's Everything We Achieved This Year

[KNOW MORE](#)

## Advisor Feature

We are happy to announce that Ran Neuner - the Cryptomanran - has joined Eleven01 as an advisor. Ran Neuner is a veteran in the blockchain industry and a well-reputed voice in the cryptocurrency space as the host of CNBC's the Crypto Trader Show - the first cryptocurrency and blockchain-based television show. We believe that he can help us take Eleven01 to greater heights with his vast experience and knowledge in the crypto-blockchain space.

### dApps: It's been 5 years since... Where are they headed now?

It's almost about to be five years since the emergence of the concept of the dApp or decentralised application. dApps were envisioned to mainly serve as open-source applications that adhere to a set of protocols and their records would be available on a publicly verifiable blockchain. But what does the future hold for dApps? Learn more about what Ausaf Ahmad believes will be the future of dApps.

## Eleven01 at Events

## Microsoft Hack Day

The Eleven01 Developer Team attended the Microsoft Hack Day - one of the biggest private hackathons - on the 22 & 24 July 2019 at The Garage, Microsoft Campus, Hyderabad. The team consisted of Eleven01 blockchain developers - Parag Rahangdale, Rajat Kesharwani, Vinod Kumar Reddy, Akhil Ageer, and Rama Iyer - CTO & President of Eleven01. They worked on a project named Eleven01 Blockchain for Azure - a private blockchain network that produces seamless enterprise integration in a few clicks.

The Microsoft Hack Day is a design sprint-like event in which computer programmers and others involved in software development, including graphic designers, interface designers, project managers, and others, often including domain experts, collaborate intensively on software projects. The goal of a hackathon is to create usable software or hardware with the goal of creating a functioning product by the end of the event.

## HYSEA Event Details

The Eleven01 team was invited to participate in the Software Product Showcase/Expo at the 27th Annual HYSEA INNOVATION Summit 2019 scheduled on 1st August 2019 at HICC, Hyderabad. The team was shortlisted to as finalists to participate in the event.

The Summit features a Conference, a Product Expo and hosts an Annual Industry Awards. The theme for this year's event is 'Nextgen Businesses: Powered by Future Technologies'.

HYSEA highlights and recognizes interesting product and start-ups in various categories through the product awards. Shortlisted award finalists are invited to the Expo to showcase their products, with an opportunity to interact with CIOs, VCs & Angel investors at the TIE-HYSEA Mentor Lounge.
