

Dear Community,

Eleven01 is - we're happy to say - on an "exciting month" roll since we started out with our newsletters. During the month of June, we worked hard towards our goal to bring blockchain to the next billion users with a protocol that will enable the creation and development of several blockchain products. With respect to the Eleven01 Community, we have an investor community that is growing in numbers and in support. We have a 20,000+ investor community on Telegram, and we are grateful for their participation and support. We have been consistently advancing our efforts to build Eleven01 as a product and expand its networks. Let's take a look at everything we have accomplished this month.

From the Eleven01 Leadership

Hello, Eleven01 Family,

June went by as yet another month where Eleven01 made progress across all fronts. We did a major event with our strategic partner Tech Mahindra for the launch of testnet on their marketplace, which is available to thousands of their customers across the globe.

Eleven01's Testnet has leveled-up as a platform as a public chain that will strengthen blockchain development for real-world use cases in both public and private workloads. Our partnership represents the larger picture for the growth and adoption of blockchain technology as we work together to create 'The Blockchain Ecosystem of the Future'.

Lastly, I think it would be remiss not to mention that June also saw the launch of plans around Libra, Facebook's digital currency. I think this is a positive development that will open the industry to much wider adoption (~2 billion users) and encourage regulators across the globe to hasten the speed of policy making affecting cryptocurrencies.

More news and updates in the newsletter below which I hope you are liking so far. Buckle up! Things are looking brighter and even more exciting for Eleven01 and the blockchain industry overall.

- Ausaf Ahmad, CEO at Eleven01

Dear Community,

Every day, we're working towards equipping the Eleven01 protocol to enable the development of blockchain-based applications. Our enterprise-focused Testnet launch with Tech Mahindra has brought us another step closer to our goals, and we are grateful that we have a meaningful strategic partnership. Moreover, we have collaborated with a few more dApp partners into the Eleven01 community, and they are building dApps with some exciting usecases.

Alongside these developments, I attended some interesting events that have opened us up to a larger global network. I attended Microsoft's the M12 Venture Summit and got to interact with various leaders from Microsoft and spent a lot of time with principals of M12, talking about Eleven01 and what we have been doing, especially of the integration with Azure. M12 event was very meaningful and substantial from Eleven01's standpoint.

M12 is one of the three events I attended this month. You can read more about the other events in this newsletter. We're working hard to build Eleven01, and we're happy to share our progress with you. Stay tuned for more updates

- Rama Iyer, President and CTO of Eleven01

Sansodhan E-waste

We have joined hands with Sansodhan E-Waste Exchange, a virtual e-waste aggregation platform, to build an organised E-Waste management sector. Eleven01 will provide the company with technological support by incorporating the blockchain technology into the e-waste ecosystem.

BLOCMINT

BlocMint

We're happy to announce that we have entered into a strategic alliance with Blocmint, a solution provider for digital transformation with a focus on the Middle East region. Through this partnership, Blocmint will work towards building a dApp using the Eleven01 protocol and will facilitate growth and development with the blockchain sector in

Major Blockchain Applications that Can Reform the Media Industry

The media and entertainment industry can benefit immensely from blockchain technology. There are several use cases given how media consumption has been impacted with more tech savvy consumers and the unchecked rise of piracy. Read more about these use cases and how blockchain can make an impact in this industry.

Eleven01 at Events

Conference with Tech Mahindra, Hyderabad

We held a joint conference with our official strategic partner - Tech Mahindra and the Govt of Telangana on 14 June 2019 at the Tech Mahindra Office in Hyderabad. The event was hosted to announce the next phase of collaboration to accelerate innovation to create 'The Blockchain Ecosystem of the Future'. In partnership with Tech Mahindra, we recently launched an early preview of the public chain, aiming to make blockchain technology ready for real-world use in both public and private workloads. The event saw prominent people: **Rajesh Dhuddu, Global Practice Leader of Blockchain at Tech Mahindra; Rama Devi Lanka, Director of Emerging Technologies at the Govt of Telangana.**

Confederation of Indian Industry, Hyderabad

Rama Iyer, CTO of Eleven01, conducted a workshop at the Blockchain Summit organised by the Confederation of Indian Industry (CII) on 19 June 2019. Rama addressed a crowd of corporate professionals, government representatives, and tech enthusiasts, talking about blockchain as a technology, how it is affecting the tech landscape as an emerging technology, and how the Eleven01 Protocol is working towards catalysing the adoption of blockchain technology.

The Confederation of Indian Industry (CII) works to create and sustain an environment conducive to the development of India, partnering industry, Government, and civil society, through advisory and consultative processes.

Microsoft M12 Venture Summit

In addition to attending the workshop by CII, Rama Iyer was also invited to attend Microsoft's M12 Venture Summit in Bangalore, Karnataka, on 24 June. The M12 Venture Summit is a gathering of 150+ leading technologists, including founders of high growth startups, top venture capital and growth equity investors, industry analysts, and senior Microsoft leaders driving innovation across global enterprises. The event focused on exploring the latest advances in cloud, AI, analytics, and mixed reality, while exploring what "edge" and "compute" means for India and beyond.

Eleven01 continues to forge new partnerships and build bridges across the globe in pursuit of bringing blockchain to the masses. Check out the details below and don't hesitate to share your feedback with us over our social media channels.

**Regards
Eleven01 Team**
