The Eleven01 Newsletter

September-October Edition

Dear Community,

The month of September was yet another eventful one for the Eleven01 Team. We have a few interesting updates to share with you with respect to the Bounty, the Eleven01 team, and some interesting product updates. We're working hard towards building the Eleven01 Protocol, and we're working on expediting things for us to head further with our roadmap. We value every bit of support that we've received from you and are excited to share every bit of our journey with you.

CEO's Note

Ausaf Ahmad
CEO - Eleven01

"The team and I are continuing to build the Eleven01 Protocol to make it a developer-friendly environment. On that note, we release a Visual Studio Code plugin for better, seamless development of smart contracts with Solidity on the Eleven01 Protocol. You can read more about it the following sections.

I am also happy to announce that the Eleven01 Team has a new addition: Suresh Ponnuswamy, a veteran technologist with a the skill and talent to help us achieve our roadmap, will be taking over as the CTO of Eleven01. I am working closely with him and the Dev Team to stay on course with our vision. Suresh is replacing Rama Iyer who has decided to pursue other opportunities. We are grateful to have had Rama as a part of the Eleven01 team and wish him luck for his future endeavours.

On behalf of the Team, I would also like to thank all those who participated in the Eleven01 bounty - the IND Contest. We are getting closer to our goals of bringing blockchain to the next billion users, and we are grateful for all the support that we received. We hope that you would stay with us on this journey and continue to support us."

Meet Suresh Ponnuswamy - the new CTO of Eleven01

Suresh Ponnuswamy
New CTO - Eleven01

"I believe that Eleven01 is creating a platform that will expedite blockchain development and engineering in India, and I am thrilled to join the Eleven01 team to materialise these possibilities and potentialities. I will be working alongside experts who are skilled and talented, and together we can strengthen the Eleven01 protocol to bring blockchain to the next billion users."

We launched Eleven01's VS Code Plugin on Microsoft's VS Code Marketplace

The screenshot shows the VS Code Marketplace page for the 'Solidity' extension by Eleven01. The top section is dark-themed and shows the extension name 'Solidity' with the identifier 'eleven01.solidity'. It includes the Eleven01 logo, a repository link, 20 forks, and five stars. Below this are 'Disable' and 'Uninstall' buttons, with a note that the extension is enabled globally. The bottom section is light-themed and shows the same extension name and logo, along with 21 installs, 21 downloads, and 0 reviews. It also includes an 'Installation' section with a code block containing the command 'ext install Eleven01.Solidity' and a 'Copy' button.

We're happy to announce that Eleven01 released a plugin for Visual Studio (VS) Code on Microsoft's Visual Studio Code Marketplace. In order to make the development of smart contracts or any Solidity-based implementations on the Eleven01 Protocol developer-friendly, we released the Eleven01 Solidity Plugin for Visual Studio (VS) Code.

We concluded the Eleven01Bounty - the IND Contest

Thanks for Your
Participation

The illustration shows a large, glowing gold coin with three horizontal lines on its face, set against a dark blue background. A man in a blue suit sits on top of the coin, holding a laptop. Two other people are lying on the ground around the coin, one on the left and one on the right, both looking at their devices. The background is decorated with small, colorful icons and a network of white lines. A large green triangle is on the left side of the illustration, pointing towards the coin.

We concluded the Eleven01 Bounty - the IND Contest on 30 Sept. We are grateful to all our participants for taking the time and putting in the effort to help us build awareness for Eleven01 and everything it represents.

Eleven01 at Events

IEEE Orientation Day

In the spirit of advocating blockchain technology to its future users, Akhil Ageer - Blockchain Developer from Eleven01 - was invited to speak at the IEEE Orientation Day at Padmasri Dr.B.V.Raju Institute Of Technology, Narsapur, on 20th September. He addressed a crowd of over 550+ engineering students about the blockchain as an emerging technology and how Eleven01 is contributing to its evangelism in India with the Eleven01 Protocol.

Eleven01 at Events

Computer Society Workshop by IEEE

We attended another event conducted by IEEE Hyderabad - Computer Society Workshop - held in the T-Hub campus on 27 September. Akhil Angeer was invited to speak at the workshop about the Eleven01 Protocol and blockchain technology as well.

We believe that our outreach to the future adopters of blockchain technology will help expedite mass adoption, and we are working on several other opportunities to bring blockchain to the next billion users. Stay tuned for more.
